This 192-page photo book is chock full of the stars of the American gay porn company Hot House. Their aggressive sex appeal, massive trained bodies, and naturally, also their pure masculinity are inspiring from the first page onward. The solo portraits will make your mouths water. This is pin-up photography at its best! After working for years as the Vice President of Falcon Studios producing almost 50 gay erotic films for them, in 1993 Steve Scarborough founded his own production company: Hot House Entertainment. The Hot House films have received countless awards and are a guarantee for high-quality pornography.
