出版者:Yale Univ Pr

出版时间:2005-8

装帧:HRD

isbn:9780300107784

This book is the definitive guide to the largest and most charismatic species of falcon in the world, the Gyrfalcon. With detailed information on life history characteristics, ecology, conservation issues, and much more, the book presents the most accurate, up-to-date, and complete view of this spectacular bird ever published. Drawing on extensive research and travel to every country within the range of the Gyrfalcon, Eugene Potapov and Richard Sale delineate a new map of the bird's range, conclude that the Gyrfalcon is more adaptable than previously thought, and restore the traditional Linnean scientific name of the species, "Falco gyrfalco." The authors also reveal that Gyrfalcons, for much of their lives, are true stenophagous raptors, a rarity not only among raptors but among all birds. Elegantly illustrated with many photographs and line drawings, this is an essential volume for ornithologists, ecologists, wildlife rehabilitators, falconers, and all others fascinated by birds of prey.
