isbn:9780495010296

Developed by the Oklahoma Climatological Survey (OCS) research and service facility, in concert with the University of Oklahoma, EXPLORATIONS IN METEORLOGY places a

strong emphasis on helping students understand weather and climate by using real meteorological data. The activities in this lab manual require that students tap into the OCS archives of meteorological data in order to complete meteorological exercises. Full-color pictures and data graphs, help students visually understand weather and severe weather topics. The lab manual also challenges students by providing optional questions intended for honors students, making this lab manual appropriate for both introductory and honors meteorology courses.
