An informative series that provides, in a concise format, better understanding of animals and their habitats. Fascinating in its diversity, the natural world comes to life on the pages of these spectacularly illustrated volumes. Bats are fascinating in their variety and unusual way of life. These fierce-looking nocturnal mammals are noted for their ability to fly and feed in pitch-dark caves and on moonless nights, guided by a highly developed sense -- sonar. The work of professional, specialist nature photographers is included in this volume.
