Free (or Almost Free) Prescription Medications: Where and How to Get Them is a step-by-step guide to over 168 assistance programs offering thousands of prescription medicines for free (or almost free) to those who qualify. All of these programs require that you have no insurance that provides prescription coverage and that you are ineligible for state Medicaid. These programs have income guidelines, but only 13 of them require your income to be less than \$715 per month for a single person. Most of the programs allow a monthly income between \$1,079 and \$3,210 for single persons. Each drug company program has its own listing that includes everything you need to know in order to apply for medications. Take advantage of the savings offered by these free (or almost free) drug company programs by following the simple instructions in this book.
