Chinese astrology is thought to be more than 5,000 years old. The Chinese developed their own unique system but, in common with occidental astrology, they too have their base in 12 zodiac signs. The Chinese focus much more on the interaction of the Sun and Moon than the other planets. Their system is based on a balanced combination of the animal year influences, adjusted by their prevailing elements, personal rising signs and Chinese moon signs. With this book, readers can benefit from this ancient wisdom and learn how to apply it to their modern lives.
