Cat owners who prefer to treat their ailing pets with natural remedies now have a guide to help them do so. The core of this book is an A-to-Z listing of ailments and conditions with corresponding herbal recipes and treatments. Also included is a section on preventative cat care and treating sick cats at home. Practical guidance, illustrated with diagrams, explains how to administer herbal medicines, apply bandages and compresses, administer ear drops, and give herbal baths. To strengthen the potency of the herbal remedies, information is given on traditional charms to recite while administering treatment, and on spiritual and crystal healing. The herbs used are very common and are easily gathered in the wild or bought from a supplier, and detailed descriptions and drawings make herb and plant identification easy.
