著者:Martin, Ann N.

出版者:Transition Vendor

出版时间:2001-4

装帧:Pap

isbn:9780939165421

Ann Martin continues her thorough investigation of pet-related issues, revealing more shocking facts. Carefully and methodically, Martin explains the ongoing problems with most commercial pet foods. She also builds a strong case against the popular raw meat diets, and questions yearly vaccinations, making a convincing link between increased cancer in pets and overvaccination. Protect Your Pet includes healthy recipes, alternative choices, and solid advice.
