"Provides an extremely valuable introduction to the work of Michel Serres for an English-speaking audience, as well as offering useful critical approaches for those already familiar with its outlines."---Robert Harrison, Stanford University blurb from review pending permission] The work of Michel Serres---including the books "Hermes,"

"The Parasite," "The Natural Contract," "Genesis," "The Troubadour of Knowledge," and "Conversations on Science, Culture, and Time"---has stimulated readers for years, as it challenges the boundaries of science, literature, culture, language, and epistemology. The essays in "Mapping Michel Serres," written by the leading interpreters of his work, offer perspectives from a range of disciplinary positions, including literature, language studies, and cultural theory. Contributors include Maria Assad, Hanjo Berressem, Stephen Clucas, Steven Connor, Andrew Gibson, Rene Girard, Paul Harris, Marcel Henaff, William Johnsen, William Paulson, Marjorie Perloff, Philipp Schweighauser, Isabella Winkler, and Julian Yates.
