著者:David R. Koepsell

出版者:Open Court

出版时间:2003-2

装帧:Paperback

isbn:9780812695373

With the proliferation of computer software and media, controversies have arisen around copyright and patent law. This book is based on the idea that the cyberworld encompasses all computer-mediated phenomena. Koepsell proposes intellectual property protection to cope with the complexities of the virtual world, and argues that the subjects of patents and copyrights are essentially the same - they are all manmade, intentionally produced objects, and all "expressions" of some kind.
