出版时间:1998-8

装帧:Pap

isbn:9780823218851

This book provides a comprehensive, critical study of the oldest and most famous argument for the existence of God: the Cosmological Argument. Professor Rowe examines and interprets historically significant versions of the argument from Aquinas to Samuel Clarke and explores the major objections that have been advanced against it. In a new Preface, the author offers some updates on his own thinking as well as that of others who have grappled with this topic.
