Brings together the most recent discoveries in quantum physics and provides a powerful argument for transforming not only the way we view nature, but also how we view our own personal reality. This book challenges readers to give up their prejudices regarding material realism, to open ourselves up to the new language and new concepts that have paralleled the growth of quantum physics, and to accept the revelation that an object and the thought of an object are both products of consciousness.

打着量子力学的幌子，其实还是self-help……其实我最讨厌一页纸能讲完的东西东拉西扯一本书了呵呵
