isbn:9781403972682

"Epistemology A-Z" introduces undergraduate and post-graduate students in philosophy to the main problems and positions in epistemology. It shows where these problems and positions connect and where they part, providing a valuable resource both for following connections between ideas and for appreciating the place of key figures and concepts in the subject. The book includes entries on some of the most important historical and contemporary contributors to the field, and alll the entries are cross-referenced with other entries so that each item is placed within the context of the wider debate, resulting in a multi-layered treatment of all of the main epistemological positions and figures.
