This new introduction replaces Marenbon's bestselling editions, "Early Medieval Philosophy"(1983) and "Later Medieval Philosophy"(1986) to present a single authoritative and comprehensive study of the period. An entirely new book written in the light of the scholarship of the last twenty years, this will be the standard companion for all students of medieval philosophy. It gives a lucid and engaging account of the history of philosophy in the Middle Ages - discussing the main writers and ideas, the social and intellectual contexts, and the important concepts used in medieval philosophy.
