isbn:9780199291243

John Hawthorne is widely regarded as one of the finest philosophers working today. He is perhaps best known for his contributions to metaphysics, and this volume collects his most notable papers in this field. Hawthorne offers original treatments of fundamental topics in philosophy, including identity, ontology, vagueness, and causation. Six of the essays appear here for the first time, and there is a valuable introduction to guide the reader through the selection.

作者介绍:

目录: Introduction

1: Identity

2: John Hawthorne & Theodore Sider: Locations

3: Plenitude, convention, and ontology

4: John Hawthorne, Ryan Wasserman, and Mark Scala: Recombination, causal constraints, and Humean supervenience: an argument for temporal parts?
