著者:Sober, Elliott

出版者:Perseus Books

出版时间:2000-1

装帧:Pap

isbn:9780813391267

Perhaps because of its implications for our understanding of human nature, recent philosophy of biology has seen what might be the most dramatic work in the philosophies of the “special” sciences. This drama has centered on evolutionary theory, and in the second edition of this textbook, Elliott Sober introduces the reader to the most important issues of these developments. With a rare combination of technical sophistication and clarity of expression, Sober engages both the higher level of theory and the direct implications for such controversial issues as creationism, teleology, nature versus nurture, and sociobiology. Above all, the reader will gain from this book a firm grasp of the structure of evolutionary theory, the evidence for it, and the scope of its explanatory significance.

主要读了《适应性》一章，逻辑脉络不够清晰。关于“适者生存”是否同义反复，作者貌似是承认了？然后借助于说受检验的是科学整体，一小句同义反复无伤大雅，把其他的生物学定律数学化了不也是同义反复么……这就很扯蛋了……
