Charles Darwin (1809-1882) is best known as a biologist and natural historian rather than a philosopher. However, in this invaluable book, Tim Lewens shows in a clear and accessible manner how important Darwin is for philosophy and how his work has shaped and challenged the very nature of the subject. Beginning with an overview of Darwin's life and work, the subsequent chapters discuss the full range of fundamental philosophical topics from a Darwinian perspective. These include natural selection; the origin and nature of species; the role of evidence in scientific enquiry; the theory of Intelligent Design; evolutionary approaches to the human mind; the implications of Darwin's work for ethics and epistemology; and the question of how social and political thought needs to be updated in the light of a Darwinian understanding of human nature. A concluding chapter assesses the philosophical legacy of Darwin's thought. "Darwin" is essential reading for anyone in the humanities, social sciences and sciences seeking a philosophical introduction to Darwin, or anyone simply seeking a philosophical companion to Darwin's own writings.

## 书评

在一排的DARWIN的传记里,我是因为封面挑中这本的:静止时空里的蓝色火焰.  
翻了翻才发现是哲学笔记.我对DARWIN所知不多(停留在高中生物课上),对影响DARWIN的维多利亚时代的英国哲学所知不多,对休谟之类根本没好印象(因为无知,所以断然下判,shame). 这是本很复杂,也很有启发性的...
