In the wake of 9/11, the Asian crisis and the 2004 tsunami, traditional analytical frameworks are increasingly unable to explain how individuals and communities are rendered insecure, or advance individual, global or environmental security. In the Asia-Pacific, the accepted wisdom of realism has meant that analyses rarely move beyond the statist, militarist and exclusionary assumptions that underpin traditional realpolitik. This innovative new book challenges these limitations and addresses the missing problems, people and vulnerabilities of the Asia-Pacific region. It also turns a critical eye on traditional interstate strategic dynamics. Critical security in the Asia-Pacific applies both a critical theoretical approach that interrogates the deeper assumptions underpinning security discourses, and a human-centred policy approach that focuses on the security, welfare and emancipation of individuals and communities. Leading Asia-Pacific researchers combine to apply these frameworks to the most pressing issues in the region, from the Korean peninsula to environmental change, Indonesian conflict, the 'war on terror' and the plight of refugees. The result is a sophisticated and accessible account of often-neglected realities of marginalization in the region, and a compelling argument for the empowerment and security of the most vulnerable.

批判性安全观在亚太国际事务问题分析上的应用，某些文章的观察有些新意。但总体还是体现了批判性观点或critical theory在理论上过于薄弱和肤浅，有为批评和批评之吹毛求疵之嫌，尚不能形成大气候。
