著者:Foerstel, Herbert N.

出版者:Greenwood Pub Group

出版时间:1993-1

装帧:HRD

isbn:9780275944476

Foerstel argues convincingly that federal control of science and technology is both a serious threat to democracy and a profoundly ineffective way to organize the scientific enterprise. Booklist required reading for anyone concerned with continued abuses of power by the military-industrial complex. Kirkus Reviews
