Encompassing the whole spectrum of the history and theory of politics from Socrates to Rawls, this is the most comprehensive and scholarly reference work available on its subject. The 350 entries, written by a team of 120 international specialists, are a balanced blend of full-length survey articles and shorter definitions. Key concepts in political thought are defined and analyzed, and ideologies are considered in relation both to historical context and to contemporary politics. All articles are cross-referenced and indexed.
