出版时间:2002-9

装帧:SAL

isbn:9780736814010

Young readers journey to space with these titles on astronauts, exploration vehicles, and robots. Fascinating NASA photographs intrigue students, while labeled photodiagrams support technical vocabulary. Hands-on activities extend the exploration into the classroom. This series explores and supports the standard "The Nature of Technology: Issues In Technology," as required by Benchmarks for Science Literacy: Project 2061.
