isbn:9780778706151

Six entertaining new books have been added to Science Alive Children will get a thrill out of participating in simple, fun experiments that help show how different scientific principles work. They will also be inspired by history boxes that offer short biographies of scientists and inventors. Ground control to budding astronauts: Earth and the Solar

System is an engaging exploration of the many worlds around us. Fun experiments include making radio waves and water rockets.
