Watch Me Grow, brand new from DK, introduces readers ages 5 and over to the fascinating world of animal development. Close-up photographs give children an animal-eye view of growing up, while simple, first-person text and fact boxes tell readers all they need to know. The first two in the series, Frog and Duckling, show tadpoles and hatchlings as they go from egg to self-sufficient youngster, introducing children to the life cycles of the natural world. Gorgeous photography and accessible information make these the next big thing in first natural history books.
