isbn:9780618275762

Baby is awake and eager for a new day. The bunny is lifted out of the crib into loving arms for a day of nourishment, stimulation, play, and care. There is so much for baby to learn, so many ways for baby to grow. The simple rhyming text and bright color illustrations will have young children reaching for the pages as they look, listen, touch, and smile at the special moments of their days. The book includes pages labeled with objects that all babies will recognize. Perfect for teaching new words to babies and the perfect book for new parents and older siblings. Sharing a baby day is like being enfolded in a warm, secure embrace.
