Most elephants in America live in circuses and zoos, and their lives are very different from what they would be in the wild. But there's a very special place in Tennessee called the Elephant Sanctuary, where elephants can finally have the freedom to roam and have elephant friends. Why do elephants come to the Elephant Sanctuary, and what is their everyday life like there? Some are like Shirley, who performed in a circus

before an injury forced early retirement and a transfer to a zoo. She lived at the zoo for many years and received good care, but she didn't have elephant friends. Then plans were made for Shirley to move to the Elephant Sanctuary, a place just for elephants. It was a big surprise to everyone when Shirley recognized another elephant when she arrived?they greeted each other with great excitement and joy and lots of trumpeting. Jenny had been a baby elephant at the circus where Shirley had worked so long ago. (Elephants do remember)
