isbn:9780688174781

Swallowtails, sulphurs, and skippers. Brushfoots, whites, and gossamer wings. So many different kinds of butterflies! In her highly praised Style, Carol Lerner shows you how to lure these winged beauties into your garden. She vividly depicts flowers that attract hungry butterflies, as well as plants where they leave their eggs. Her clear text explains what butterflies eat and how they grow -- from caterpillars to full-grown fliers. Every bright butterfly inside this book also appears on the endpapers. Can you match them all? With some practice, you'll soon be able to identify those that come to your own butterfly garden.
