'Provides practical and proven tools for assessing and improving learning and

performing in science. You and your students will unquestionably benefit from their use' - From the Foreword by Jay McTighe, Educational Consultant. Standards-based science education is inextricably linked to performance-based student assessments that are clear, consistent, and accurate measures of what students know and are able to do. Containing more than 100 ready-to-use rubrics, this compact volume meets that need by offering K-12 students the most complete collection of field-tested evaluation tools in science available today. Combining clarity, detail, utility, and practicality, these performance list rubrics, holistic rubrics, and analytic rubrics accommodate diagnostic, formative, and summative assessments and scaffold essential performance tasks across all grade ranges.
