出版者:Between the Lines

出版时间:2002-11-29

装帧:Pap

isbn:9781896357614

Education for Changing Unions presents a rich, stimulating, and provocative storehouse of practical and structured activities, ideas, and debate about union education. Written in a clear and accessible style, the authors have created a book to inspire working people and teachers in many settings and locations. All the exercises and activities have been widely tested. Six thematic threads tie the book together:

community, democracy, equity, class consciousness, organization building, and the greater good. Evaluation, strategic planning, and survival for the long haul round out the discussion. See also the popular companion book, Educating for a Change, Martin et al. (BTL, 1991).

作者介绍:

The five authors are all seasoned community and union activists with several decades of combined experience. They have written widely on education and equality.
