isbn:9781849519182

Create Vagrant projects

Sync folders with your virtual development environment

Integrate your own machine with the virtual machine

Manage provisioning the server configuration with Puppet and Chef

Set up multiple virtual machines for a single project

Configure your virtual environment on your network

Build your own base box for Vagrant

Import and manage operating system images in Vagrant

Get to grips with good practices for developing projects on your local machine

Set up a simple LAMP server for a Vagrant project

作者介绍:

Michael Peacock

Michael Peacock (www.michaelpeacock.co.uk) is an experienced Senior/Lead Developer and a Zend Certified Engineer from Newcastle, UK, with a degree in Software Engineering from the University of Durham. After spending a number of years running his own web agency, managing the development team, and working for Smith Electric Vehicles on developing their web-based Vehicle Telematics platform, he currently serves as a CTO for Ground Six (www.groundsix.com), an ambitious tech company, where he leads the development team and manages the software development processes. He is the author of Drupal 7 Social Networking, PHP 5 Social Networking, PHP 5 E-Commerce Development, Drupal 6 Social Networking, Selling Online with Drupal E-Commerce, and Building Websites with TYPO3. Other publications Michael has been involved in include Mobile Web Development, Drupal for Education and E-Learning, and Jenkins Continuous Integration Cookbook, for which he acted as a Technical Reviewer. Michael has also presented at a number of user groups and conferences including PHP UK Conference, Dutch PHP Conference, ConFoo, PHPNE, PHPNW, and Cloud Connect. You can follow Michael on Twitter, @michaelpeacock, or find out more about him through his blog, www.michaelpeacock.co.uk.
