著者:Erickson, Jon

出版者:Facts on File

出版时间:1995-1

装帧:HRD

isbn:9780816031306

This highly illustrated set examines the fascinating world of geology with clarity and precision, from the basic building blocks of geological study -- fossils and minerals -- to more unusual and intriguing phenomena such as petrified forests and natural bridges. This volume traces the damage that human expansion has caused.
