Here's the only series that teaches professional-level computer topics visually. Step-by-step screen shots demonstrate over 150 Windows Vista Sidebar techniques,

including creating a gadget HTML interface; setting gadget height, width, and font; applying visual effects to text; using JavaScript in a gadget; adding or hiding content in a gadget display; building a flyout panel; defining default settings for gadgets; using XMLHttpRequest to download data; handling loading errors in XML documents; displaying data from a PHP script; and more.
