isbn:9780415328548

The Language of Websites explores the ways in which websites use and present

language. It covers many different types of web-based interaction, from buying online and auction sites, to search engines, email links and chatrooms, and also considers the structures of language online, such as audience interaction and how hypertext alters narrative structure

This book offers students practical advice on how to build their own website and features a full glossary.
