Review

'In Russia 2025 an all-star cast of Russia-watchers provides an in-depth examination of the societal, governmental, economic and political forces that will shape Russia over the next decade and a half. This is the essential guide for anyone trying to figure out what lies ahead for Putin's Russia.' Fiona Hill, Center on the United States and Europe, Brookings Institution, USA 'Russia-2025 is a fascinating book. It captures the complexity and uncertainty of the moment and the hard choices Kremlin and Russian society face. It is a great example of critical independent analysis, result of the

collective effort of some of the most insightful experts on the country's politics, economy and society. The book provides something that is most lacking in the current debate on Russia, namely- alternative views on Russia's future.' Ivan Krastev, IWM Institute of Human Sciences Vienna, Austria 'Russia is never what meets the eye. President Vladimir Putin, a decade and a half into his dominance of Russian politics, follows a more authoritarian path than ever. But multiple fault lines accumulate beneath the surface. This fascinating collection is the best guide available to the forces simultaneously maintaining and undermining the Russian status quo.' Timothy Colton, Department of Government, Harvard University, USA

作者介绍:

Maria Lipman is the Editor-in-chief of Pro et Contra, a policy journal published by the Carnegie Moscow Center. She has published a number of articles on the Russian media, politics and society and co-edited volumes including The Convolutions of Historical Politics (2012).

Nikolai Petrov is Professor at Higher School of Economics, Moscow. He was previously a Director of the Society and Regions project at the Carnegie Moscow Center. He has been the author or editor of numerous publications dealing with analysis of Russia's political regime, post-Soviet transformation, socioeconomic and political development, including The Political Almanac of Russia (1999)
