

Game Art

[Game Art_下载链接1](#)

著者:Linde, Riccard

出版者:Charles River Media

出版时间:

装帧:Pap

isbn:9781584503958

作者介绍:

目录: Table of Contents

Acknowledgements
Preface
Introduction
Who Benefits from Reading this Book?
What to Expect from this Book
What you need to know
Programs Used in the Book
Part I Industry and the Artist:

Chapter 1 Games & Industry
Game History
The People and Industry Today
Work Mentality
An Industry in Movement
Summary

Chapter 2 Game Artists
Artist in the Game Industry
How to become a Game Artist
From Home
In School
Expectations from the Studio
Careers as an Artist:
Technical Art Director
Art Director
Lead Artist
Modeler
Texturer
Level Designer
Environment Artist
Animator
Effects Artist
Concept Artist
Cut Scene Artist
Keep Up or Give In
Summary

Chapter 3 Your Portfolio - Interview - Contract
Include in your portfolio
Art Test
The First Interview
Salary Discussions
The Contract and the First 6 Months
Summary
Chapter 4 Creation of a Game
The Team
Pre-Production
From Idea to a Game
Concept and Pitch to the Publisher
Scheduling / Production
Proof of concept
Production
Milestones / Deadlines / Crunch Times
Alpha
Bug Testing / Fixing

Art Freeze
Beta
Quality Test / Game Localization
Gold
In-between Projects
Summary
Part II General Art Creation:
Part Notes
Chapter 5 Grow as an Artist
Evolve and Expand
Emotional Images
Photographing / Composition
Research and Reference
Light and Darkness
Color Schemes
Dirt and Scratches
Less Is More
Kill Your Darling
Games Visuals
Team Work Processes (Style Guide)
Personal Workflow and Speed
Technical Limitations
Copyrighted Material
Summary
Chapter 6 Game Modeling
Model after Reference
Polygonal Objects
Polygon Limits (Low-Polygon)
Low-Polygon Modeling
Polygon Placements
Modeling Theory
Polygons vs. Faces
Arc Flow Edge Technique
Subdivided Technique
Model for lighting
Modeling for UV reuse
Characteristic Technique
Shape
Quantity Objects
Optimizing Objects
Open Edge Objects
Edge rotation
Smoothing Groups
Cleanup and Exporting
Optimizing Objects
Double Sided Polygons
Merging Vertices
Z Fighting
Setup For Animation
In Production
Box modeling
Optimizing
Summary

Chapter 7 UV Layout

Setup UV

UV Resolution

Object vs. Object

UV Pixel Ratio

Projecting UV

Planar Projection

Automatic Unwrap

Planning UV Layout

UV Editor

Tiling UVs

Mirror / Overlay UVs

Summary

Chapter 8 In Production: Model / UV

Low polygon modeling

Modeling

Right Side

Left side

Magazine and Normal mapping

Finishing up the model

Overlook quality

Setting up the UVs

Stitch, Move and Sew

Straighten UV

Arranging UV Layout

Summary

Chapter 9 Texture Creation

Color Channels (RGB)

Diffuse map

Color map

Alpha Channel (A)

Transparency Map

Gloss / Specular Map

Environment Map

Tiling Textures

Detail map

Practical Photoshop Tricks:

Layers

Dirt and scratches

Cleaning up Textures Highlights

Texture Quality

Color Matching, Histogram

In Production

References

Import the Object UV

Work Layers

Main Color

Fill Lights, Shadows, and Highlights

Scratches, Edges, and Dirt

Summary

Chapter 10 Effects in Games

Emitters

Particles

- Sprites
- Mesh
- Textures
- Animated Textures
- Animated UVs
- Blend modes
- Decals
- Water
- Summary

Chapter 11 Character Animation in Games

- Animation: Games versus Movies

- Controlling the Mesh

- Blending and Cycles

- Motion Capture

- Physics

- Summary

Chapter 12 Collision

- Programmer controlled collisions

- Object collision

- Mesh collision setup

- Performance

- Summary

Part III Technical and Performance:

- Part Notes

Chapter 13 Artistic Performance

- Memory Vs. Performance

- Rendering Performance

- Polygons Vs Vertices

- Culling / Clipping plane

- Object Culling

- Level of Detail (LOD)

- Tri-Stripping / Tri-Listing

- Draw calls

- Clustering Of Objects

- Reusing UVs and Textures

- Atlas Textures

- Alpha blend / Alpha ref / sorting

- Sprites and Billboards

- Ambient objects - Grass

- In Production: Object instancing

- Summary

Chapter 14 Texture Technologies

- Colors

- Color-indexed

- Color Depth

- Raw Image

- Targa (TGA)

- Direct Draw Surface (DDS)

- HDRI (High Dynamic Range Image)

- Volume (3D) Textures

- Texture Resolution for Games

- Texels versus Pixels

- Mipmapping

Summary
Chapter 15 Game lighting
Per-Vertex Lighting
Vertex Controlling
Vertex Color
Vertex Alpha
Pre-calculated Vertex lights
Vertex Soft / Hard Edges
Per-Pixel Lighting
Bloom
GI Lighting
Dynamic Lighting
Game Shadows
Vertex Shadows
Code Shadows
Texture Shadows
Mesh Shadows
In Production
Summary

Chapter 16 Hardware
PC Technology
Graphic Cards
Gaming Consoles
Microsoft Xbox
Sony Playstation 2
Game Experience
License Engines
MOD
Summary
Part IV Advanced Game Art production:
Part Notes
Chapter 17 In Production: Multi-Texturing
Multiple Textures
Multiple UVs
Setup Multi-texturing Blend in 3D
Layered texture Nodes and textures
Multiple Mesh UV sets
Connect UV sets to the Layers
In Production
Arranging Textures
Layout UVs
Summary
Chapter 18 Hi-res Modeling
Edge Modeling
SubD
The Next Step, Paint in 3D
Modeling Hi-res for Games
In Production
Edge Modeling
High polygon modeling in Zbrush
Summary

Chapter 19 Normal mapping

Adoption Color map
Normal map Color Information
Tangent Space
Object / World Space
Normal maps in the 3D Viewport
Maya
3ds max 7
Creation
Painting Normal Maps
Photoshop Plug-in
High-resolution Mesh Calibration
Maya 6
3ds max 7
Zbrush 2
ATI and NVIDIA
In Production
Old house
Ak47
Creature Head
Parallax Displacement mapping
Summary
Chapter 20 Shaders
Vertex Shaders
Pixel Shaders
Shaders for Programmers
DirectX, Microsoft
SGI OpenGL
NVIDIA CG shaders
Shaders for Artists
In Production
Color, Specular, and Normal Map
Multi-Texturing
Summary
Book Summary
Index
Library of Congress Subject Headings for this publication:
Computer games -- Programming -- Vocational guidance.
Computer games -- Design -- Vocational guidance.
