作者介绍:

Eelco Plugge was born in 1986 in the Netherlands and quickly developed an interest in computers and everything revolving around them. He enjoyed a study at the ICT Academy in Amersfoort, after which he eventually ended up as a data encryption specialist working at McAfee at the age of 21. He's a young BCS Professional member and shows a great interest in everything IT- and security-related, but also everything related to the Japanese language and culture. He is working upon expanding his field of expertise through studies and maintaining a young family while at it.

Hailing from the U.K., Peter Membrey has worked for Red Hat, holds a RHCE certification, and worked and taught at a number of educational institutions since the beginning of his career. He knows what Linux users like and need, and hopes that CentOS will get the kudos it deserves. He lives in Hong Kong and is teaching and consulting on all matters to do with Linux Enterprise networking, while studying for his master's degree.

书评

仔细看看！新手是不可能知道的。我照着命令打了，提示说未定义的参数 --replSettestset！！！然后我在命令中间加了个空格，这个...

相对RDBMS，MongoDB本身不是太复杂的数据库，这本书可以很轻松让你了解关于MongoDB全面的知识，从GridFS到replica sets,从Php、Python如何连接MongoDB到Shards；这是第二版,覆盖比较新的2.4版本.
