isbn:9780736813006

Fascinate your readers with feline facts and fun This series will lure even the most

reluctant students and pique their curiosity about cats. Fashioned after our wildly popular series Learning about Dogs and Learning about Horses, these books highlight the physical characteristics, demeanor, history, and special features of twelve of the most popular cat breeds. Special sections on what judges look for at cat shows and how to care for each breed also are included. This series explores and supports the standard "The Living Environment: Diversity of Life," as required by the Benchmarks for Science Literacy: Project 2061.
