Teaching is now a global profession. Good teaching is at premium in every country and every society is making major investment to develop effective and professionally competent teachers. This book now gives us an insiders view about you can teach effectively, revealing the secrets of the trade, with practical guides, exercises, evaluations and a lot more. Drawn from 461 years of experience and research in teaching, the 16 authors of this book are all experienced university and college teachers. The added value of this book is that the contributors come from a wide and varied disciplinary background -- from the sciences, mathematics, art, history, geography, psychology, economics, sociology, English and more! The book is organised into three major, step-by-step sections: Before We Teach; How We Teach; How we Assess. The book also takes you through the complex issue of marking, evaluating and assessing students English is rapidly becoming the language of instruction at universities and colleges around the world and this book will be appreciated by an international audience.
