This practical series is designed to help early childhood teachers, P.E. specialists, special educators, and therapists develop and improve motor skills abilities in all children who have coordination and movement difficulties, ages 5 and up. Each book in the series contains hundreds of developmentally age-appropriate activities to build young children's competence and confidence in specific skills in a positive, enjoyable learning environment. The primary focus is to provide quality teaching, assessment, and remediation to meet the specific needs of each individual child.
