Think science is a bunch of test tubes, microscopes and guys in lab coats? Think again Science is bursting with far-out but true stories, fascinating puzzles and mind-boggling mysteries. "Science Detectives" follows fearless and dedicated science sleuths tracking down leads and solving cases all over the world -- in cities and in deserts, deep underground, high in the sky and even in your DNA. "Science Detectives" includes five fascinating projects to test your science-detection skills.
