The creepy crawlers and flying critters that populate the bug world come alive in this new series. Clear explanations and vivid examples of primary characteristics, life cycle, homes, and eating habits will captivate readers as they explore the fascinating world of bugs. Full-color photographs, glossaries, and indexes enhance all volumes in the series. With ears on its legs, wings that make a chirping sound, and eyes that can look in over a thousand directions at the same time, the cricket is one fascinating insect. "Cricket describes the life cycle, eating habits, and homes built by the insect.
