This imaginatively designed padded cloth book takes toddlers shopping-to the supermarket, the florist, a toy store, clothing store, and several other shops before bringing baby home on the front and back covers. The store on each cheerfully illustrated page features a padded cloth item attached to the page with a Velcro tab, and which toddlers can pull off the page and insert in a tiny cloth shopping bag that comes with the book. For example, a miniature cloth rocking horse can come off the toy store's shelf and go into the bag-and a carton of milk can be removed from the supermarket counter. Then, back home, a refrigerator door opens and the milk carton attaches to a Velcro tab inside. Meanwhile, the rocking horse attaches to the bedroom floor, and a shirt from the clothing store can go into a dresser drawer. When it's time for kids to put the book away, it can be closed up tight with Velcro tables and a sturdy zipper, then put back into its vinyl carrying case. That soft transparent case features a snap to keep it shut and a cloth handle for carrying around. (Ages 2-5)
