isbn:9781555915971

It all starts with a turtle, wandering about aimlessly on a fine day, who borrows a set of wings from a flamingo. This sets in motion a delightful chain of events--the flamingo

borrowed some quills from a porcupine, who borrowed the wool from a sheep, and so on--that brings renewed admiration for each animal's unique qualities. Charming and beautifully illustrated, *The Turtle and the Deep Blue Sky* is destined to become a favorite of young children and the young at heart.
