RESCUE TRUCKS is ideal for the young emergency enthusiast. Its pages actually fold out and turn into extra-long highways - full-colour playscapes featuring all sorts of calamities: fallen bridges, flooded highways, forest fires and so on. Flip the fold-out over and a new set of playscapes (with black and white art) invite a lot of colour-me-in-time. We threw in build-'em-yourself instructions for things like paper tube tunnels and shoebox bridges. Last but not least, of course, are the hardworking rescue vehicles themselves, a fire engine, police cruiser, tow truck and snow plough. These emergency rigs really roll and are ready to respond to the next urgent call. It's an entire search-and-rescue team, table-top style.
