Students who have learned their ABC's will now have even more fun learning to count with this delightful addition to their library. Michigan flora and fauna take a starring role in this new title, taking students from "one Karner Blue butterfly" to "twelve jugs of maple syrup." Teachers and parents alike will find themselves reading and counting over and over again while everyone learns fun Michigan facts. This is a wonderful companion book to "M is for Mitten: The Michigan Alphabet Book."
