Pumpkin Smile is the true story of six-year-old Hannah who is going through the common childhood experience of losing her baby teeth, one after the other. At first, she thinks it is fun, until the gaps make her talk with a lisp. Besides that, her tongue sticks out! Embarrassed, Hannah decides not to smile again until her new teeth grow in. Soon, Halloween arrives, and Hannah and her Dad cleverly figure out how to turn her problem into a funny, but useful idea.
