出版时间:2006-5

装帧:Pap

isbn:9780760323526

When Lionel introduced its new FasTrack system in 2004, model train enthusiasts quickly warmed to the increased realism - right down to the integrated roadbed and darkened centre rail - and the greater ease of use. In this book, the author of "The Big

Book of Lionel" presents the first complete guide to the FasTrack system. Amply illustrated with colour photographs and 36 track diagrams, the book instructs readers on every aspect of the system, from assembling and disassembling FasTrack to building a simply oval, planning a layout within various space constraints, building tracks for two trains and reversing trains, and designing unique layouts - even yard layouts.
