著者:Manoilov, G. (EDT)/ Radichkova, B. (COM)

出版者:Elsevier Science Ltd

出版时间:2006-12

装帧:HRD

isbn:9780444517708

The dictionary will contain terms currently used in the broad fields of electronics data protection and data management in today's interconnected world - the Global Village. The terminology will cover all aspects of the modern technology's best practices in multiple subfields, namely: physical (hardware and perimeter) security, wired and wireless telecommunication infrastructure security, internet (e-commerce and business-to-business) security, anti-virus and anti-spyware applications, virtual private networking, theory and practices of cryptography, corporate security policies' methodology, design, implementation and enforcement. This book contains 5000 terms in English, German, French and Russian. It is a valuable reference tool for both the general public and the industry experts. It can be used as knowledge support in theoretical projects. It could also serve as a handy desktop reference book in day-to-day operations in a multilingual environment.
