"Enhancing Learning Through Human Computer Interaction" is an excellent reference source of Human Computer Interaction (HCI) applications and designs. This premier reference source provides a complete analysis of online business training programs and e-learning in the higher education sector. It describes a range of positive outcomes for linking information management techniques, which exploit the educational benefits of Web-mediated learning in computer-supported collaborative learning. Case studies depicting practical approaches for increasing the human dimension of HCI are also included to supply researchers and practitioners with innovative real-life examples.
