isbn:9780072259605

This is the most efficient way to learn J2EE programming techniques. Two Oracle experts demonstrate techniques for working within J2EE and JDeveloper for the thousands of developers currently using Oracle Forms and the PL/SQL language.

Oracle is shifting their focus towards Java technologies, so you will need to know how to use the Java-based J2EE and JDeveloper. The book includes explanations of the Application Development Framework (ADF). Throughout, high-level and low-level Forms concepts are related to Java concepts so that you can become comfortable with the new terminology. It covers the new components required when developing and deploying a J2EE application. Special mentions in the text describe how JDeveloper techniques translate to PL/SQL or Oracle Forms. It covers JDeveloper 10.1.3 and ADF Faces, and all code and examples will be available online.
