more! Do you want to master Flash video work, and work your way toward creating awesome, mind-blowing, interactive web applications? Well, don't go any further--this full color book is all you need to step into the future. When Flash Professional 8 was released, it seemed as if we'd embarked on a web video revolution almost overnight. Up until then, web video was a morass of competing players, technologies, standards, codecs, and playback quality. The inclusion of the On2 VP6 codec, the FLV Playback component, alpha channel video, and the Flash 8 Video Encoder has ended the infancy of web video, creating an instant benchmark with no stops in between. And this book is the ultimate guide to Flash 8 video--it offers practical advice, technical guidance, and a full series of creative projects ranging from the dead simple to the complex in a manner that talks to you as an equal and makes only one assumption: basic familiarity with the Flash interface. We start with the basics--how to edit video in some of the most popular packages available (such as iMovie and Movie Maker 2) and create a Flash video file and import it into Flash. Next, we move on to the good stuff--creating a custom video player; creating an alpha channel video and using it in some spectacular projects; turning your creativity loose by applying filters and blend effects to video using the Flash interface and ActionScript; creating video walls, menus, and stunning masking effects; and exploring how Adobe After Effects 7 and Flash Professional 8 are poised to become a motion graphics powerhouse. Best of all, you will discover something the authors had discovered by the time they started writing this book...this stuff is fun!
